Experience

Ernst & Young

Stockholm, Sweden

CONSULTANT — DATA & ANALYTICS

Jul. 2022 - Present

- **MICROSOFT VIVA INSIGHTS:** A project utilizing Microsoft VIVA Insights, which is a part of the Microsoft VIVA package. VIVA Insights gathers meta-data regarding employees activity in Outlook and Teams, in order to help business leaders address critical questions about business collaboration and work culture. The platform gives insight into how work impacts people and the business itself. Leveraged with other sources of data, such as Office and Meeting Room Utilization, the team delivered strategic, data driven insights and visualizations.

Adrian set up the data model with the correct attributes, tables and data types. He also set up the relationships to connect different data sets and variables. Subsequent data analysis and visualizations involved DAX and Power Query in PowerBI. The Pandas library in Python was used for niche operations.

- **DATA ANALYSIS FOR INTERNAL CONTROLS:** EY helped the client to design and implement internal Controls over Financial Reporting (ICFR) for key business processes. In order to help and evaluate the effectiveness of these controls Adrian assumed the role as Data Analyst where he analysed data stemming from payment flows with the use of Python. The pandas, numpy and seaborn libraries were used for data celaning, analysis and visualization.

Ernst & Young

Stockholm, Sweden

CONSULTANT — IT, TECHNOLOGY AND RISK

Aug. 2021 - Jul. 2022

- **IT AUDIT – MULTIPLE CLIENTS:** IT audits are performed as part of financial audits, meaning they are performed according to statutory requirements and verify compliance to applicable laws and regulations. Adrian has conducted IT audits in several sectors, such as Investment Banking, Real Estate and Transportation.

Adrian performed interviews with clients to get an overview of the client's IT environment, infrastructure, performed IT general control testing to evaluate the effectiveness of the client's controls of IT risks. Assessments of the clients' IT processes were performed and the results and recommendation for improvements were compiled in a report. Findings and recommendations were presented to management.

Bane NOR (via DfindIT)

Oslo, Norway
